SEAMLESS GARMENT Today we add the third and final approach to the dilemma of making moral decisions in this series. The discerning (also called the responsibility or revisionists model) attempts to combine the value and wisdom of law (rooted in reality) with the uniqueness of concrete situations. Rooted in reality, this approach avoids relativism, accepts the significance of the concrete situation, and avoids blind obedience to law. The discerning approach, though certainly not the easiest, best respects the complexities of life in answering our question, "what ought I to do?"
